

RePro Partners

The partnership structure is based on three different type of partnership. The **main partners are university/educational institutions and one company partner**, totally 8 partners. **Dissemination partners consist of educational unions and professional organisations**, 8 partners altogether. **The company partners (9 companies) operate closely with universities to produce and test REPRO-cases, model and guidebooks.** All university partners have a good experience in international co-operation as well as in company collaboration and dissemination. Partners have large networks and good relationships also to other educational institutions and local companies. Most of the company partners operate in the international business sector and this is important for the actions and results.

To sum up, the **partnership structure includes a good combination of educational organisations, companies and dissemination bodies regionally as well as internationally.** This partnership structure enables the benchmarking and the results of the project to be disseminated at EU level.
